PROFESSIONAL SUMMARY

Backend and AI developer with experience building production systems with MCP, LLMs, NLP, and REST APIs. Strong background in chatbot architecture, secure integrations, and Unity/Python cross-stack development for real products.

EXPERIENCE

Cogitia <i>MCP, LLM, Intelligent Agents, Chatbot and REST API Developer</i>	Madrid, Spain (Remote for Barcelona, Spain) 14/05/2025 – 20/05/2026
---	--

- Designed and maintained MCP servers for enterprise workflows using embedded LLM clients and robust prompt/tool/resource patterns.
- Developed intelligent LLM agents with LangGraph-style orchestration for business automation workflows.
- Implemented secure authentication flows (OAuth 2.1 and header-based auth) and scalable integrations with internal systems.
- Built NLP modules for automation, including data operations, scheduling, and internal query handling.

Word Games <i>Game Developer, Development Team</i>	Havana, Cuba (Remote for Bogotá, Colombia) 20/10/2024 – 10/05/2025
--	---

- Led end-to-end programming of Arcane Ascent (deck-building roguelike) and shipped the title on Steam Early Access.
- Integrated native Steam systems (achievements and saves), improving platform readiness and user experience.
- Developed an automated language-generation pipeline using NLP + OpenAI, with JSON-based Python–Unity interoperability.

Devman <i>NLP, Chatbot and REST API Developer</i>	Havana, Cuba (Remote for Madrid, Spain) 10/04/2024 – 14/10/2024
---	--

- Architected an e-commerce assistant combining NLP intent handling and product retrieval for faster discovery.
- Built backend services in FastAPI, including API key security, WebSocket chat, and authorization layers.

EDUCATION

University of Havana <i>Bachelor of Computer Science</i>	Havana, Cuba Expected 23/01/2024
--	-------------------------------------

- Relevant study fields: Artificial Intelligence and Machine Learning, Information Retrieval Systems, Compilers, Operating Systems, Databases, Distributed Systems, Networks, Data Structures and Algorithms, Design and Analysis of Algorithms, Graph Theory, Number Theory.

SKILLS

Languages: Spanish (native), English (B1).

Programming: Python, C#, C/C++, JavaScript, Assembly (MIPS).

Technical: MCP, LLMs, LangGraph, LangChain, NLP, RAG, FastAPI, TensorFlow, PyTorch, .NET, Databases, ReactJS, Unity Engine.
